POD PETITE LINER CASSETTE REFILL

Easy to replace, the liner cassette offers complete protection for service personnel with zero exposure to waste. The continuous liner is perforated and gently scented. Liners are flexible, strong, tear-resistant and made with 20% recycled materials. The biodegradable plastic will degrade and disappear (1-5 years) leaving no fragments, no methane, and no harmful residues. Both are functional and eco-friendly meaning the Pod Petite Liner Refill Cassette is the ideal option.
